DETAILED ACTION

Election/Restrictions

1. This application is a 371 of PCT/EP99/00155. For applications filed under 371, PCT rules for lack of unity apply. The European Search Report cited prior art (Wim Van Den Ende et al., Plant Physiol., 149:43-50, 1996) which indicates lack of inventive step in the instant claims and hence lacks special technical feature. Hence the Restriction requirement is proper.

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 29-49, drawn to a process for the manufacture of chicory inulin

Group II, claim(s) 50-60, drawn to an improved standard or high performance grade chicory inulin

Group III, claim(s) 61-64, drawn to a method of use of improved standard grade chicory inulin

The inventions I - III do not meet the requirements for unity of the invention because the inventions do not share the inventive step and hence lacks special technical feature, which defines a contribution to which each of the inventions makes over the prior art.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter and the search for one group is not required for any other group, restriction for examination purposes as indicated is proper.

Art Unit: 1656

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
